# Kovari (Flagship Product)

AI-powered workflow intelligence that extracts, structures, and automates processes from any document.

Kovari is the central platform that transforms unstructured and structured data into actionable workflows, creating clarity, efficiency, and compliance across industries.

# Kovari Nexus (Integrations & APIs)

Seamlessly connects Kovari with your existing ERP, CRM, and business systems, ensuring a single source of truth across the enterprise.

Kovari Nexus provides robust integration capabilities through APIs and connectors, enabling organizations to unify their technology stack and accelerate digital transformation.

# Kovari Insights (Analytics & Reporting)

Transforms workflow data into real-time insights, compliance dashboards, and decision-ready reports.

With Kovari Insights, decision-makers gain visibility into process performance, compliance gaps, and efficiency opportunities, empowering smarter strategic choices.

# Kovari Flow (Process Automation Builder)

Empowers teams to design, optimize, and automate workflows with an intuitive, drag-and-drop interface.

Kovari Flow allows users to streamline complex processes, reduce manual effort, and build custom automations without coding expertise.

# Kovari Guard (Security & Compliance)

Delivers end-to-end data protection, audit trails, and regulatory compliance for every workflow.

Kovari Guard ensures that sensitive information is secured and all workflows meet international standards, building trust with regulators and stakeholders.
